Subject: RE: Conversation with EPA (Ravi) Re: Wing Wall

Miles -- EPA concurs on this proposal and will attach the information below as an addendum to the Jan 20th Design Submittal for JFOS with regards to disposal requirements for TSCA material. Should you have any questions, please let me know.

Regards,

Ravi

Subject: Conversation with EPA (Ravi) Re: Wing Wall

I spoke with EPA (Ravi Sanga) and informed Ravi construction of the dividing wall between RCRA and CERCLA projects is scheduled for this Friday, 6 June per B&T's drawing (attached). During the conversation, Ravi stated he would like the excavated materials to be treated as TSCA waste. I informed Ravi that we concur with his decision and the excavated materials would be staged on a liner within the Blue Wedge area and covered. Proper protocol for TSCA waste disposal would be followed.

We spoke briefly regarding the area behind the coffer dam. Ravi plans on amending the EPA order once we have developed and submitted a statement of work and a proposed plan.
